

## **Amana Tool Unveils New Product Catalog Offering Hundreds of New Items for Woodworking & Contracting Applications**

*Innovative tool design and special-grade carbide help users avoid chip out in furniture-making, cabinetry and closet manufacturing applications*

**Farmingdale, N.Y. – October 26, 2011** – manufacturer of industrial-quality carbide-tipped, solid carbide and replacement carbide cutting tools, today unveiled its latest product catalog, containing thousands of solutions for professional woodworkers and hobbyists alike. In addition to hundreds of new problem-solving products, the catalog also features a new design with original photographs, improved product and material explanations, and designation of new Amana-unique tools. The design enables users to easily navigate Amana's entire product line of router bits, saw blades, shaper cutters, boring bits and solutions to select the best cutting tool for their specific needs.

Frank Misiti, technical director at Amana Tool, said, "We are excited to show the result of numerous hours of hard work developing the most user-friendly, comprehensive catalog in the industry. Our expanded product offerings demonstrate Amana's strong commitment to quality, assortment and our customers, giving both professional and novice woodworkers access to the tools they need for a wide range of materials and functions."

### **Among the new products featured in Amana's latest catalog are:**

- Corner rounding 3D carbide-tipped router bit (item #49528)
- Prestige™ mighty adjustable super-fine dado / groover set (item #61372)
- Solid carbide roughing spiral multi flute router bit (item #46133)
- Large radius ovolo carbide-tipped router bit (item #49124)
- Solid carbide mini compression spiral router bit (item #46184)
- Double edge folding V-groove router bit (item #45792)
- And many others.

Amana's complete collection of cutting tools is manufactured according to stringent quality standards from only the highest quality European steel and European sub-micro grain carbide. The unique, high-grade carbide and special grinding angles provide high-quality finishes and superior cutting performance that save users time and labor. Amana's unique solid carbide grade is proven to last longer and retain a sharp edge longer than most solid carbide bits.
